

What if your marketing and communications work could help create a world free of untreatable infections?

At **Ondine Biomedical**, that's not a slogan, it's our vision.

We're pioneering **photodisinfection**, a light-based antimicrobial technology designed to rapidly prevent and combat infections without contributing to antimicrobial resistance. Our Steriwave® technology is already being used in hospitals, helping protect patients and support healthcare teams at a time when the global threat of drug-resistant infections is growing fast.

As our impact grows, so does our need for thoughtful, motivated communicators.

As part of our team, you'll support marketing and communications initiatives—including corporate and investor communications—that help bring Steriwave to hospitals and ultimately to patients who need better protection from infections. You won't just be "doing marketing"; you'll be contributing to a mission that affects lives.

If you're curious, motivated by purpose, and eager to learn in, and contribute to, a fast-paced healthcare innovation environment, we'd love to hear from you.

Marketing Intern

Location: Canada (Remote/Hybrid available)

Type: Part-time (approx. 20-25 hrs/week, flexible)

Compensation: \$24-28/hr (based on skills and experience)

About Ondine

Ondine Biomedical is a Canadian life sciences company and leader in light-activated antimicrobial therapies ('photodisinfection') for the prevention and treatment of infections, including those caused by multidrug-resistant organisms. We are a small and nimble team, solution-oriented, passionate and dedicated.

- Our **vision**: a world free of untreatable infections.
- Our **purpose**: provide simple solutions to complex infections.
- Our **solution**: a patented, light-activated antimicrobial that destroys bacteria, viruses, and fungi in minutes, without antibiotics or resistance.

Our lead product, Steriwave® nasal photodisinfection, is already used in hospitals in Canada, Europe, Mexico, and Australia, and is in Phase 3 clinical trial in the U.S. to prevent post-surgical infections.

About the Role

You'll support marketing and communications efforts that elevate Ondine's breakthrough story within healthcare and investor communities. Gain hands-on experience designing campaign assets, crafting social media content, contributing to event coordination, and analyzing campaign performance.

Key Responsibilities

- Organize and manage digital content assets.
- Support campaign execution: scheduling, posting, and monitoring.
- Assist with drafting, editing, and formatting marketing materials and social media posts.
- Perform basic campaign analytics (KPIs & performance tracking).
- Assist with event planning and coordination.
- Conduct research on industry trends, competitors, and customer insights.

Requirements

- Enrolled in a university program (BComm, Marketing, Communications, or related field), ideally in 3rd year or later.
- Strong written and verbal communication skills in English.
- Comfortable working independently with guidance as needed.
- Proficient in Microsoft Office; experience with Canva or Adobe Creative Suite is a plus.
- Interest in healthcare innovation and antimicrobial technologies.

Why You'll Love It Here

- Make a real impact in the fight against antimicrobial resistance.

- Gain valuable marketing experience in a cutting-edge biotech company.
- Flexible, part-time work schedule tailored to student life.

How to Apply

Submit your resume and a brief cover letter via email to marketing@ondinebio.com.
